Family Behavior Solutions, Inc

Reinforcing Families, Finding Solutions

We are THE ABA Partner for Schools

Hello!
We are excited to meet with you! We know being an educator is not easy, and we would love to help your school or district to provide compassionate, therapeutic services to children diagnosed with Autism and related disabilities in the classrooms.

We use evidence-based practices and current research in the field of Applied Behavior Analysis (ABA) as a basis for our services. We believe each client has a right to effective, thorough, individualized, collaborative, and goal-focused treatment, and we strive to assist individuals to achieve a lifestyle of potential, independence, and dignity. Our Treatment Team relies heavily on the partnership with the students and school, and -- if requested --the family, to achieve these goals.

Our personalized school services may include: BCBA consultations, assistance with assessments, and/or coaching and training to your educational team. They may also include 1:1 direct services designated by the the IEP for each student, implemented by Behavior Technicians (BT) and with regular supervision by one of our Clinical Supervisors. We are able to tailor our services to meet your needs.

Our goal at FBS is to provide effective and high-quality treatment for each student, to collaborate with the educational team, and to create a comfortable and rewarding learning environment for all. We are here to help and empower your students and your educational team to get the most out of our ABA services.

We have included further information about our company and services we can provide. Please contact us to set up a time to discuss how FBS can partner with your school to assist your team and students.

Thank you,

Nicole Quigley, BCBA
Executive Director
